# CONGOLESTIC

CODING, ROBOTICS, INTERNET OF THINGS WORKSHOPS, FORUM & DIRECTORY

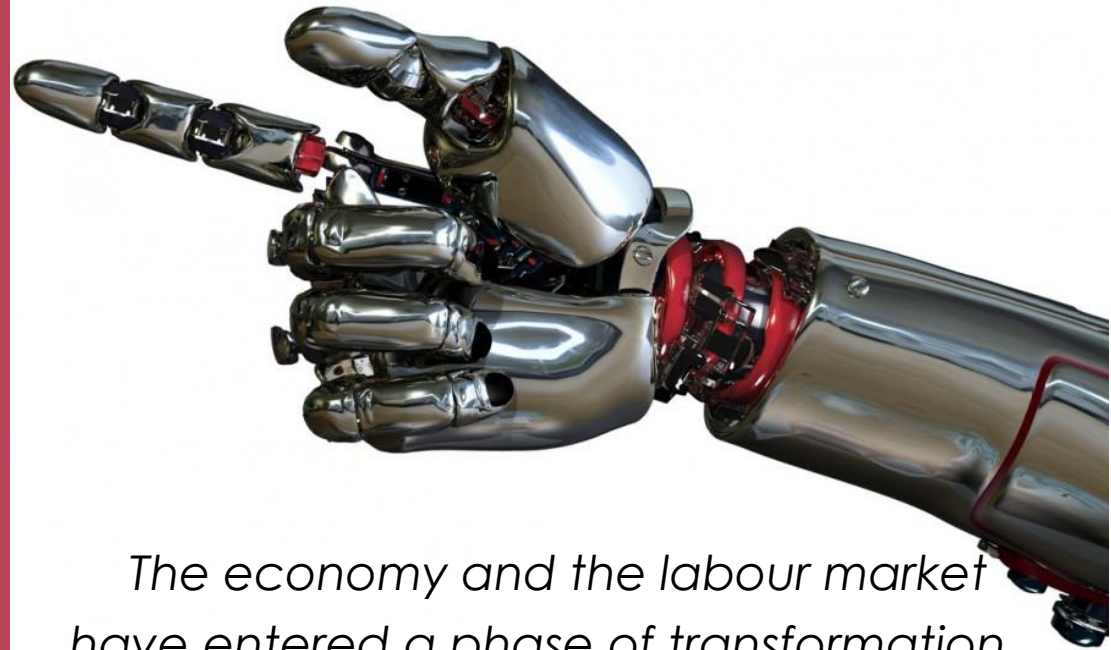

---

Science, Technology,  
Engineering and Math (STEM)  
carry the innovative spirit  
needed to meet the  
challenges of the future.

---

Our vision is to become an attractive, formative and locomotive hub of innovation and technological development for the youth in the DRC

*The economy and the labour market have entered a phase of transformation, linked to the contribution of technologies and dictated by fast changing needs.*

# MISSION

The non-governmental organisation called: CONGOLESE AND INFORMATION COMMUNICATION TECHNOLOGIES "CONGOLESTIC" was created in 2015 in accordance with the legislation in the Congo.

CONGOLESTIC's mission is to raise enthusiasm, train and provide information on new communication technologies.

# 1. CODING WORKSHOPS

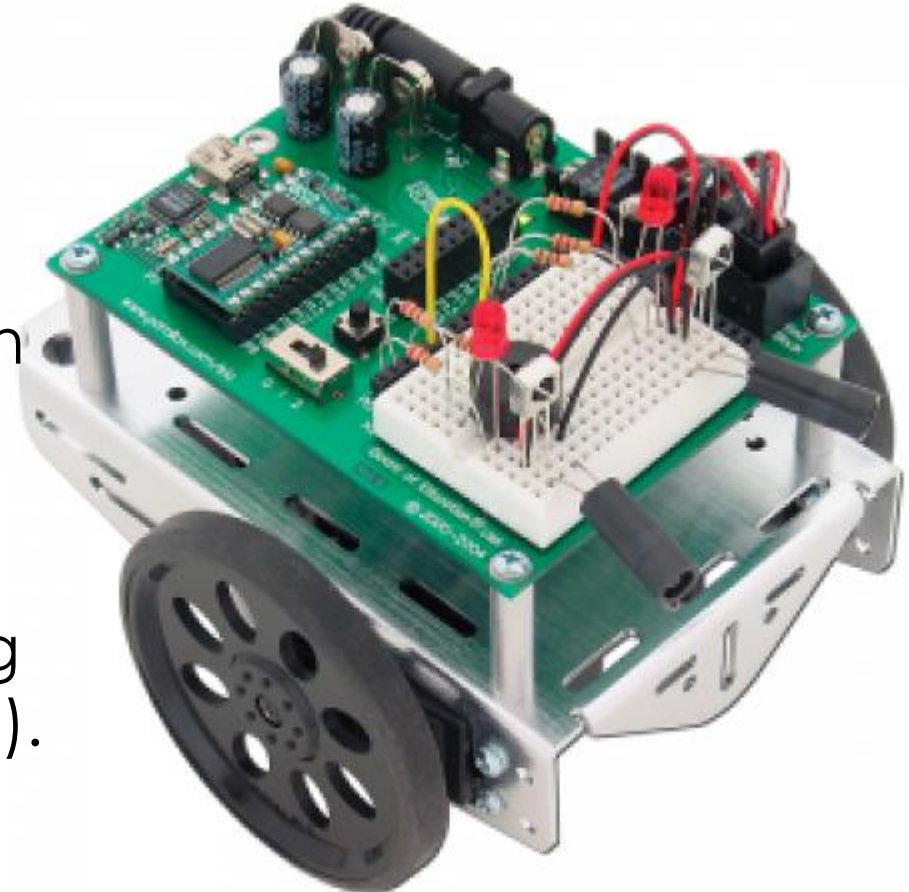

Under the impetus of Code Club America, CONGOLESTIC offers young people aged 7 to 18 a **FREE** extracurricular activity where they can carry out computer projects through coding in a friendly atmosphere.

The educational material has been designed and tested by educators so that children and young people learn to code while having fun.

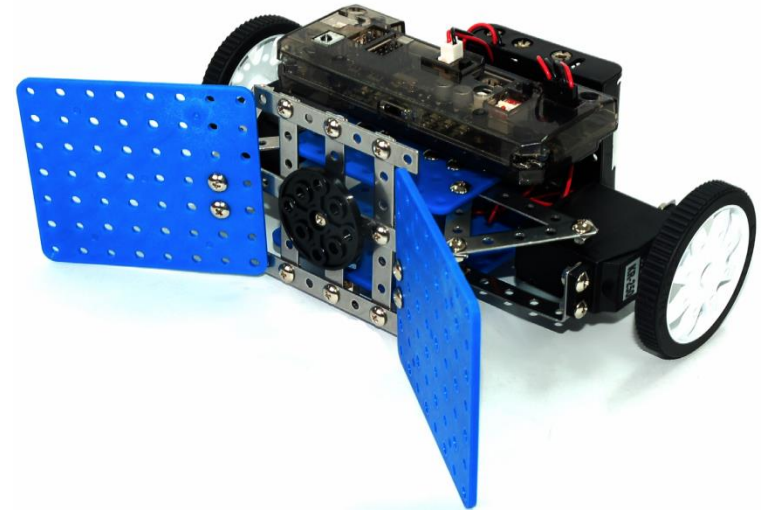

## 2. ROBOTICS WORKSHOPS

Robotics is the art of making robots or machines that combine concepts from various disciplines. Robotics is an excellent vehicle for raising curiosity and learning Science, Technology, Engineering and Mathematics (STEM).

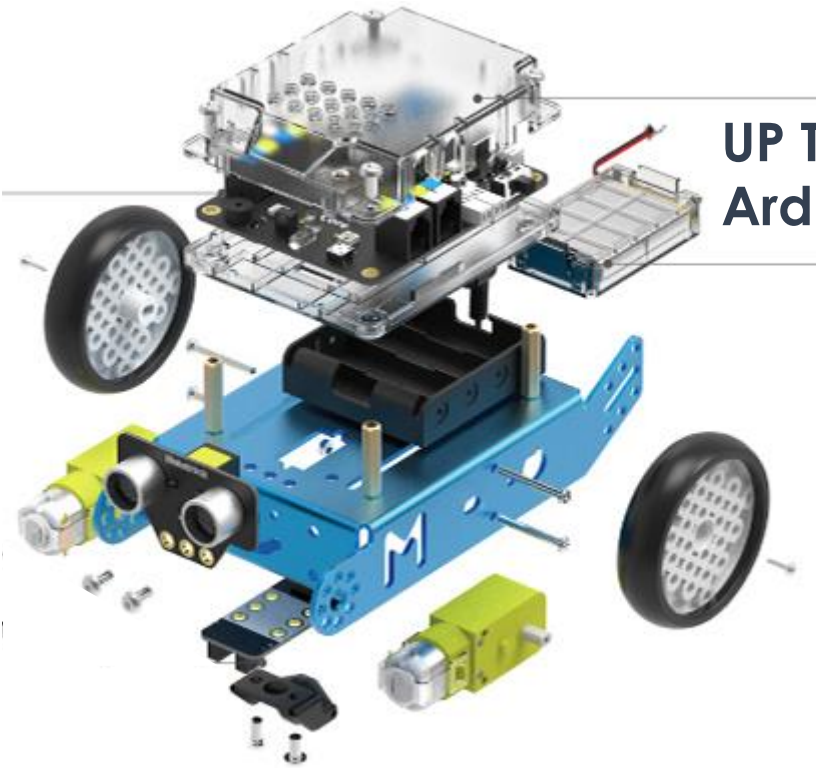

*“Demystifying coding and creating your own robot helps you learn how engineering is applied.”*

**UP TO 50 ROBOTICS & IoT PROJECTS with  
Arduino, Raspberry Pi, mBot and more.**

### 3. ONLINE SAFETY WORKSHOP

Online security is closely linked to crime outside the web and provides insights into crimes committed in the natural and artificial world.

Our high-quality internet safety workshop allows students to use the Internet and social media with discernment, logical thinking and keep their personal information confidential.
